

## Mario DiPietro, P.E.

Vice President/Division Manager

Mario DiPietro is a project manager of Britt, Peters and Associates for the civil engineering area of the firm. Mario earned excellent work experience during college when he worked with a surveying company performing all duties, from surveying to drafting. He continues to use past experience in his approach to the civil engineering process. Since beginning his civil engineering career twenty-three years ago, he has performed a variety of different services: land planning, design, construction and project management. For ten years he owned his own civil engineering firm which worked on large and small residential subdivisions, commercial and industrial site plans, water systems, sewer systems, pump station designs and municipal roadway rehabilitation. He has also overseen the implementation of numerous projects, including contract award, administration, and payment requests.
